

CSS COMMERCIAL CONCRETE DATABASE

The Construction Support Services Commercial Concrete database has over 1100 items of work for General Conditions, site concrete and building concrete. The phase structure of the database is arranged in the 1995 divisions of the CSI Master Format.

We have also utilized WBS Codes to assign all of the items in the database to the 2004 CSI Master Format as well as the UniFormat numbering system.

This database is complete with labor productivity, material unit pricing and Subcontractor pricing which can be modified by the end user with their specific historical data.

The database includes assemblies with extensive assembly help with sample details and photos for every Assembly.
