

Sage Construction and Real Estate Solutions

Commercial/Residential Landscaping Database

The Commercial/Residential Landscaping Database gives you the information you need to begin estimating productively right away.

Thousands of standard industry items—from soil and plants to irrigation components—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Estimating, an application for Sage Timberline Office and Sage Master Builder, makes it easy to add your own items, formulas, assemblies, and productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies that let you take off even the most complicated building component, like irrigation system piping, in one step. For example, when taking off a lateral line of irrigation system pipe, simply enter one set of dimensions and the assembly will generate labor and material costs for the pipe, trenching, backfill, and more.

General Database Specifications

- 1159 Items
- 133 Formulas
- 30 Bill of Material Classes
- 26 Smart Assemblies within the following Divisions:

Landscaping

Irrigation

Drainage

Paving

BENEFITS

- Improve ROI by jumpstarting your database building efforts
- Save time by using prebuilt items, assemblies, and formulas right out of the box
- Easily customize (pricing, labor, and productivity factors) to fit your specific needs

Commercial/Residential Landscaping Database is part of the Sage Construction and Real Estate family of fully integrated software created to streamline work and connect the people you depend on to build your business.
