Industrial Process Piping Database

The Industrial Process Piping Database gives you the information you need to begin estimating productively right away.

Thousands of standard industry items—from copper, stainless steel and ductile iron piping to connections, supports and anchors—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Estimating, an application for Sage Timberline Office and Sage Master Builder, makes it easy to add your own items, formulas, assemblies, and productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies that let you take off even the most complicated building component, like stainless steel piping, in one step. For example, when taking off a run of stainless steel pipe, simply enter one set of dimensions and the assembly will generate labor and material costs for the pipe, insulation, tees, caps, couplings, lab joints, and more.

General Database Specifications

- 18723 Items
- 275 Formulas
- 43 Bill of Materials Classes
- 136 Smart Assemblies within the following Divisions:
 - General Conditions
 - Demolition & Sitework
 - Pipe – Cast Iron (Duriron)
 - Pipe – Copper
 - Pipe – Plastic
 - Pipe – Stainless Steel
 - Pipe – Carbon Steel
 - Pipe – Specialties
 - Sample Applications

BENEFITS

- Improve ROI by jumpstarting your database building efforts
- Save time by using prebuilt items, assemblies and formulas right out of the box
- Easily customize (pricing, labor, and productivity factors) to fit your specific needs

Industrial Process Piping Database is part of the Sage Construction and Real Estate family of fully integrated software created to streamline work and connect the people you depend on to build your business.
