

Sage Construction and Real Estate Solutions

Industrial Plant and Process Database

The Industrial Process and Plant Database gives you the information you need to begin estimating productively right away.

Thousands of standard industry items—from site piping to pumps and compressors—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Estimating, an application for Sage Timberline Office and Sage Master Builder, makes it easy to add your own items, formulas, and productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies that let you take off even the most complicated building component, like turbine pumps, in one step. For example, when taking off a turbine pump with concrete pads, simply enter one set of dimensions and the assembly will generate labor and material costs for the pumps, pads, liquid curing compounds, finish, rebar, grout, and more.

General Database Specifications

- 19,953 Items
- 1142 Formulas
- 194 Bill of Material Classes
- 338 Smart Assemblies within the following Divisions:
 - General Conditions
 - Demolition and Sitework
 - Pavements and Surfaces
 - Site Piping
 - Site Improvements
 - Concrete
 - Masonry
 - Metals
 - Carpentry
 - Thermal and Moisture
 - Doors and Windows
 - Finishes
 - Equipment – Pumps and Compressors
 - Pipe and Mechanical
 - Copper Tube
 - Pipe Plastic

BENEFITS

- Improve ROI by jumpstarting your database building efforts
- Save time by using prebuilt items, assemblies and formulas right out of the box
- Easily customize (pricing, labor, and productivity factors) to fit your specific needs

Industrial Process and Plant Database is part of the Sage Construction and Real Estate family of fully integrated software created to streamline work and connect the people you depend on to build your business.
