Sage Estimating

Sage Estimating Scheduling Integrator

The more time you have to troubleshoot, the better. Project success depends on your team's ability to plan ahead.

With Sage Estimating Scheduling Integrator, you have the tools to start the ball rolling long before construction begins. Quick, realistic project schedules are only an estimate away when using the Integrator to connect Estimating to industry-standard scheduling software—like Primavera or Microsoft Project for Windows.

Why build a schedule from scratch when so much useful information is already at your fingertips, such as labor and equipment details, material items, productivity factors, and estimator notes. Scheduling Integrator makes the most of your work by gathering these items from Estimating,* an application for Sage 300 Construction and Real Estate (formerly Sage Timberline Office) and Sage 100 Contractor (formerly Sage Master Builder), and automatically creating a planning base of tasks or activities for use in building a schedule. Simply open the project file in your scheduling software and you're well on your way. Scheduling Integrator is a tool to jump start and simplify the scheduling process, and give your team more time to plan for success.

Features

- Produces a schedule specifically geared to Primavera—Primavera Project Planner (3.0 and 3.1) and SureTrak Project Manager 3.0—or Microsoft Project, or a generic file for use in other scheduling software.

- Generates tasks/activities by group phase, phase, item, assembly, material class, subcontractor, location, job cost phase, CAD reference or Work Breakdown Structure (WBS) codes in the estimate.

- Lets you specify how work and duration units are measured (by hours, days, weeks or months) based on scheduling software options, and choose how days and weeks are defined.

- Calculates durations for entire task/activity.

- Tracks labor/equipment resources, as well as subcontractors and special material resources.

- Automatically transfers estimator notes into scheduling software.

- Update a schedule with estimate additions or revisions.

- **Runs on:**
  - A single workstation housing both Sage estimating and scheduling software.
  - Two workstations, one hosting Sage estimating and the other hosting the scheduling software.
  - A network.

*Sage Estimating Standard or Extended

Benefits

Provide access to estimate data without requiring knowledge of or use of estimating software.

Give management and project team members access to estimating details (view and print) without sacrificing estimate data integrity.

Save time and eliminate the need for manual distribution of hard copy reports.

Share estimate information electronically via email.
