

JumpStart Wireless™ for use with Sage Software™ Save an hour a day per employee!

You invested in great Sage management software. Unfortunately, your mobile employees lose an hour a day communicating essential information to and from your Sage software.

Now you can end this waste of time and money.

With JumpStart Wireless use your existing cell phones and Blackberrys to send and receive vital field data to and from Sage Timberline Office or Sage Master Builder.

JumpStart Wireless eliminates paperwork, streamlining time reporting, service orders, field (daily) reports, inventory tracking and asset management

JumpStart Wireless delivers breakthrough productivity for businesses with mobile staff, eliminating wasted travel time, constant interruptions, delays, and inaccurate paperwork that kill productivity and profits.

With JumpStart Wireless technology, companies report a savings of up to an hour a day per staff member. You can be up and running in a few days with an affordable and easy-to-use system.

Features

- Connected and disconnected operation
- GPS Location Tracking
- Bar-coding, printing, and signature capture
- Customizable by customers
- Centralized management and configuration
- Every form and task is secure and reliable

Benefits

- Reduces operating costs
- Increases productivity in the field and office
- Eliminates faxes and extra trips to the office
- Streamlines business processes
- Minimizes training costs with wireless versions of existing processes and forms
- Automatically and instantly delivers work orders, field reports, time sheets, and other job information to and from your Sage software.

JumpStart Wireless™ for use with Sage Software™

Information entered once in the field using simple menus is sent to your Sage Software causing a breakthrough in efficiency for your business.

"We have worked with many technology organizations over the years, and JumpStart Wireless has been the standout of them all, the only organization that has really listened to our goals and seamlessly achieved the desired result....30 times return on investment in the first year....we expect a savings of \$300,000 per year."

Don Smith, President

Service Management

Technicians have all the information they need

Monitor availability and work load, eliminating extra trips to office. Saves driving time and cost of gasoline.

Dispatch service calls throughout the day / Customer and issue information on device / Bar-coding, printing and signature capture / Expedite billing

Time Cards

No data entry, no chasing down paperwork, no holding up payroll

Employees send in their hours wirelessly.

Time card hours with job codes / Accurate, up to the minute / Track regular and overtime hours / Improved resource allocation

Field Reports

Spend more time managing the job, less time in front of a computer

Field Reports entered into devices gives you real-time status of daily activity updates from the field.

Labor hours tracked by cost code / Equipment tracked and materials used real time / Change orders, jobsite visitors, work completed / Eliminate lost, incomplete and illegible paperwork

Asset Management

Reduce your parts inventory cost

Receipts, disbursements and returns are captured, automatically updating job cost and inventory.

Material is tracked by item number and job / Inventory data updated after each transaction / Bar code scanners simplify data entry, reducing errors
