**Save Time Designing and Distributing Presentation-Quality Reports**

Create and customize presentation-quality reports from your Sage MAS 90 or Sage MAS 200 ERP systems data with Crystal Decisions software. Crystal Reports® is a powerful report writer that allows you to create meaningful reports quickly and easily. You can use sample reports straight out of the box (see the column at left for a listing of the 27 report templates included). Or, modify reports to suit your needs, then save and run them anytime.

Take control over the look of your documents by selecting font type, size, and color. Enhance the layout by applying lines, borders, and shading. Further enrich your reports with embedded pictures, diagrams, and logos. Use tables, cross-tabulations, or one of 12 graph styles to communicate your financial information. You can even create reports with drill-down capabilities simply by selecting that option for the detail section of a report.

Crystal's "Experts" are wizards that guide you through the report process from start to finish, and Private Tutor is a built-in training and online help system. You can run your reports at pre-determined times, even unattended. See the features list on the reverse side for exciting new capabilities.

The ODBC (open database connectivity) driver, included with the application, gives Crystal Reports direct access to Sage MAS 90 and 200 data. The ODBC driver also provides read-only access to Sage MAS 90 and 200 data for other applications, including Microsoft Word, Excel, and Access software—for automatic transfer of your accounting information into other applications and report writers. Crystal Reports is included with your Sage MAS 90 or 200 software.
