Specifically designed for Timberline Office, MyAssistant proactively identifies what needs to be done, determines who needs to be informed, and automatically performs the task. MyAssistant uses Microsoft Outlook to deliver essential information, when it's needed.

Put MyAssistant to work for you

Use a simple wizard to give MyAssistant Tasks. For each Task, tell MyAssistant what you want done and when. Use any of the prebuilt Tasks or define your own.

- Select one of the more than 270 prebuilt rules, or create your own, to identify exactly what should be monitored or occur
- Schedule a Task to run at specific times, or run it on demand
- Identify who will be notified
- Define the format and content of the recipient's email message
- Attach one or more reports to each email, with report content specific to the email recipient
- Attach any documents or files to each email

Get control with MyAssistant Tasks ▼

MyAssistant is a powerful tool to manage your business:

- Inform project managers of jobs not billed in 30 days and with costs exceeding billings
- Upon receiving a cash receipt, receive a list of AP invoices that should be paid
- Identify terminated employees and send your insurance company a letter to remove them from your coverage
- Receive alerts when working capital drops below a certain amount
- Recognize new vendors and request a W-9 from them
- Know when invoice discounts are about to expire
- Send each project manager a list of overdue RFI's, submittals, and change requests, with detailed logs attached
- Learn of invoices not coded to a job but use a job account number
- Notify your president of employees celebrating a birthday

Improve communications, reduce errors, and increase productivity.
