

7 years in the making!

Would a **BETTER ANALYSIS** help you to win more jobs?

Would the **ELIMINATION OF ERRORS** save you money?

Would you like to take out the **GOTCHAs**?

Would you like to **STOP THE** bid day **CHAOS**?

Would you like to **DO AWAY WITH** complicated spreadsheets, cards, paper systems and dead programs?

We all know the problems, now finally the bid day **SOLUTION!**

PRIME BID *The Powerful Competitive or Negotiated Bid Preparation and Analysis Software*

"You've got to have the right tool to get the job done, Prime Bid is the right tool for preparing a competitive bid."

Leo Finnegan Construction - Mark Hoffman

Prime Bid is a complete bidding software system for Construction Management or General Contractors to use in competitive bids, negotiated bids or construction management and design build work.

BEST NUMBERS: Prime Bid has matrices that solve for the best mathematical solution for one or more subs/suppliers to complete a bid package. This allows for non obvious group(s) of subs to be used to come to the most competitive bid. Since the process is automatic, it is easy to be more competitive with less effort. The low bid best number is displayed in a green color. Your excluded bids are red and required bids are blue. Immediately know how those decisions affect the bid.

STOP THE ERRORS: Eliminate input or sub number errors. A yellow color displays for a low bid that has been triggered by a cautionary percentage. This is a visual alert to check the numbers. Eliminate math errors because you do not have to write any formulas, the entire math is fixed. Eliminate the gotchas in a sub's bid scopes. Create an accurate comparison of the bids with scope adjustments to make bids compare apples to apples.. You instantly see the differences in scope of work, adjustments and the bid impact.

TEAM PLAY: Prime Bid allows having several people in the bid at one time; this allows the decision maker to spend more time managing the bid, while the other team members are cramming sub bids into their machines. Everyone is contributing to completing the bid. The processing and reviewing of the bids are captured in real time, and able to be reviewed by all involved.

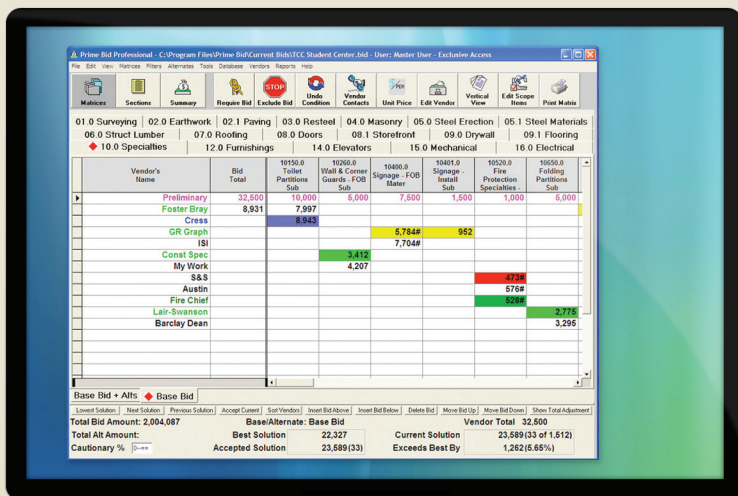

FLEXIBILITY: Prime Bid is built flexible enough to fit the job, your style of bidding yet gives you the structure to work in. You have the

flexibility to make critical changes on the Fly and see their immediate affect on the bid.

COST SAVINGS: Accurate bids save money and increase profits. Errors cost money. Maximize your team to produce more bids in less time which gives you more chances to win bids. With Prime Fax the built-in ITB allows you to get more sub bids in to become more competitive.

INTEGRATED: Popular Estimating Software and spreadsheets import into Prime Bid. Just export from existing estimating software, transferring those costs over to Prime Bid and start the bidding process.

EASILY MANAGE Alternates and complex bid requirements: Prime Bid's automated detailed information functions manage and calculate the alternates, owner supplied breakdowns, bid items, DBE goals, subcontractor listings and other complex bid document requirements in seconds. Prime Bid is designed to complete the difficult analysis to fill in your bid documents in the last few minutes with just mouse clicks.

QUICK TO LEARN User Friendly System:

"Here at Mid-States the team that assembles our bid was able to use Prime Bid within one week of getting it. To me that is the definition of user friendly software. We process our bid now with an easier method to get a more sophisticated result."

Mid-States Construction- Gary Sebens
